

OutBack Power Systems Awarded GSA Contract

Contract allows company to compete in Federal Sales Arena

ARLINGTON, WA – December 15, 2009 – OutBack Power Systems, Inc., (www.outbackpower.com) a manufacturer of reliable and durable power electronics products, announced today that it has been awarded General Service Administration Contract (GSA) #GS-07F-0373V. This contract has significant impact on the company as it expands their presence in the government sales arena, making listed products available to all government customers.

“We are very excited about this new contract and its significance to our company,” said Stephen Humphreys, President OutBack Power Systems. “GSA status will allow us to better penetrate the government market by making our products readily accessible to all government customers allowing us to continually grow our company.”

“OutBack Power would like to thank the Snohomish County Procurement Technical Assistance Center (PTAC) for their involvement in this process,” said Jim Barbero, Business Development Manager-Government Segments. “PTAC was instrumental throughout the application process and their guidance and support are appreciated.”

Founded in 1949, GSA manages more than one-fourth of the government’s total procurement dollars and influences the management of \$500 billion in federal assets, including 8,600 government-owned or leased buildings and 213,000 vehicles. GSA provides a centralized delivery system of products and services to the federal government, leveraging its enormous buying power to get the best value for taxpayers.

OutBack Power strives to be the leading manufacturer of rugged inverter/chargers for use in applications where instances of severe shock and vibration are of chief concern. By providing a the US government with a highly durable and reliable product OutBack Power ensures that they are delivering a solution that will hold up even in extremely harsh environments.
