OutBack Power Systems Announces FLEXnet™ DC

ARLINGTON, Wash., June 15, 2007 – OutBack Power Systems, Inc., a global manufacturer of power electronics products, is pleased to announce the FLEXnet™ DC Advanced DC System Monitor. OutBack Power Systems has developed this revolutionary new product to allow users to have an easy to understand, comprehensive view into their system.

The FLEXnet DC is an Advanced DC System Monitor providing an in-depth view into your system's performance and efficiency – users can now see the level of DC power being generated, how much power is consumed, as well as gauge overall battery health in both Amp-Hours, as well as a much more customer relevant, Kilo-Watt hours. Capable of tracking 128 days of data, the FLEXnet DC also helps improve overall system performance and efficiency and can reduce generator run-time/fuel-consumption. The FLEXnet DC is the first DC System Monitor to offer three channel monitoring and has been designed for ease of installation and to be compatible with existing OutBack systems.

“The FLEXnet DC helps translate a user's system into a more efficient, reliable and robust power system,” stated Bryan Thomas, Product Manager “This Advanced DC System Monitor will provide you with the answers you need to make sensible power decisions, allowing you to extend your system's battery life and reduce generator run-time/fuel-consumption.”

The FLEXnet DC will be available in late summer, and is accompanied by Outback's two year warranty.

About OutBack Power Systems:

OutBack Power Systems is a global designer and manufacturer of cutting-edge power conversion solutions that provide reliable electric power for the renewable energy, mobile and backup power markets. OutBack Power's engineers have decades of power conversion electronics design and equipment installation experience and share a passion for leading the industry into a new era of performance, ease of use, and standardization. OutBack Power is a privately held corporation located in Arlington, WA USA with a European sales office in Barcelona, Spain.
